

Offering hands-on experience in a progressive, rural mixed animal practice.

If you are a 3rd or 4th year veterinary student in good academic standing with an interest in rural or mixed animal practice, we invite you to come and learn with us. As a family run and owned veterinary business, we offer hands-on opportunities in equine, small & large animal care and an in-depth look at practice management. However, more than that, we offer a realistic view of what it truly is to live your work, love your job, value your ability & enjoy your life.

Several of the staff enjoying a trail ride on a quiet August day.

Broodmares relaxing at Haymaker Farm, where the equine hospital, breeding facility and equestrian center are located.

Dr. John Schroeder palpating a heifer at the ranch of one of our pure-bred Angus Breeders.

ARE YOU READY TO EXPERIENCE...

Dr. Ben examining a dairy cow. We service over 30 small-medium sized dairy operations in Northeast Nebraska.

Do you wonder what life is like after you graduate? Does the thought of staff management scare you? Are you wondering if your classes and rotations have REALLY given you enough experience to tell the owner of the cow you're examining that she is 3 months bred? Perhaps you are still fuzzy on working up an anorexic cat or a mildly lame horse. No matter what your interest, there is something different when you finally get to "make-the-call" or see your patient through the entire treatment.

THE OPPORTUNITIES

*Extensive equine therio March– June including stallion collection, embryo transfer, artificial insemination and foal management.

*Stockmen's Livestock Market 3-4 days/week which includes working cattle and, November– May, mouthing & pregnancy checking cows & heifers

*Small animal medicine, surgery and health appointments

*Learn about client communication techniques, practice management, and staff relations.

*Appreciate what life and family can be like when you are working in a rural mixed animal practice.

*Work with numerous different species, with different types of owners, that will challenge your knowledge, your ability to think outside the box and above all, to provide the best care possible for your patient.

Housing is provided in a newly remodeled 2 bedroom house complete with laundry and full kitchen. (Students will need a vehicle & a cell phone.)

Dr. Erin performing a small animal surgery

-A furnished, newly remodeled 2 bedroom house will be provided. Students will need a cell phone, vehicle, money for food (a grocery store is 3 blocks away) and a willing positive attitude.

-Externship can vary from 2-6 weeks depending on student availability.

-Located in the rolling hills of Eastern Nebraska, 25 miles South of Yankton, SD and 40 miles west of Sioux City, IA.
